

COVID-19 Egypt Cases tracks the daily progression of confirmed cases, deaths, recoveries, hospitalizations, and lockdown status in Egypt starting February 2020. The data is calculated day by day and includes lockdown status, sourced from the Egyptian Ministry of Health and Population.

Hypothesis 1:

- H_0 : There is no significant difference in new confirmed cases during lockdown vs non-lockdown periods.
- H_1 : New confirmed cases are significantly lower during lockdown periods.

Hypothesis 2:

- H_0 : There is no significant correlation between daily new confirmed cases and daily new deaths.
- H_1 : There is a significant positive correlation between new confirmed cases and new deaths.
